They may have additional requirements to import into each territory as each one has a delicate ecosystem they are trying to protect.*

*An individual is generally considered a bona fide resident of a territory / possession if he or she is physically present in the territory for 183 days during the taxable year, does not have a tax home outside the territory during the tax year, and does not have a closer connection to the U.S. or a foreign country. However, U.S. citizens and resident aliens are permitted certain exceptions to the 183-day rule.*

- All foreign diplomats (A-1 visa types) are required to be processed via the Department of State on a DS-1504 form, which is submitted to the Department

of State by the consulate / embassy of the diplomat at least 10 days prior to arrival of the shipment.

- Brokers are not allowed to clear Customs on CF-3299 entries for foreign diplomats holding an A-1 visa.
- For duty-free clearance, the household goods must have been used at least 12 months in the foreign household prior to shipment from the origin country.
- The owner of the goods must hold the proper long-term visa (non-B1 / B2 visitor's visa) to import household goods duty free.
- The owner of the goods can only import personal effects, e.g., clothing, camping gear, toiletries, etc. on a short-term visitor's visa.

It is important for agents in the origin country to make sure the ISF is timely filed prior to the sailing of the vessel from the last foreign port for all ocean shipments to avoid penalties.

- Customs and other government agencies can require a variety of different types of examinations that result in costs from USD 200-1700 or more on a full container load (FCL) shipment.
- Most household items used less than 12 months will require duty to be paid.
- It is important for the owner of the goods to list those items in detail on the back side of the Customs Form 3299.

Additional port specific declarations may be required for this temporary importation
- A bill of sale or pro-forma invoice with the statement of value must include the vehicle's description, vehicle identification number (VIN), model, and year of manufacture.
- In general vehicles that are 25 model years old and with the original drive train are exempt from EPA / DOT regulations.
- Vehicles less than 25 model years old that were not previously titled in the USA must comply with EPA / DOT regulations.
- The cost and time to bring a vehicle into compliance by an ICI (certified conversion shop) make the process an unwise economic decision in most cases.
- It is strongly recommended not to import non-complying vehicles.

In the event an owner of the goods elects to attempt to import a vehicle it should be sent separately from household goods and personal effects shipments to avoid delays in the receipt of the shipment.
- The owner of the goods must make arrangements with an ICI shop in the USA prior to shipping the vehicle in order to get an estimate and to determine if the vehicle can be brought into compliance.

- Paintings of nominal value can be shipped with household goods shipments.
- Artifacts of any type should not be shipped without first checking with the USA agent and the country of export, as different regulations may apply depending on the country of origin, type of artifact and circa date.

    - If Customs feels the amount is excessive they will require the owner of the goods to hire a licensed alcohol importer to file a commercial entry.
  - Only persons 21 years and older may enter with alcohol.
  - Domestic importers should comply with the residence state laws which vary from state to state.
    - Some states allow no alcohol imports while others require the owner of the goods to obtain a permit and pay a fee and still others allow a reasonable amount.
    - Each state has regulations and must be consulted before making a shipment.

    - The permits cannot be issued once the shipment has left the origin country.
  - The destination agent will need to know the common, scientific names and country of origin to determine if a permit is required.
- Weapons
  - Guns (ammunition should not be shipped as it is a hazardous good) previously owned and shipped from the USA can normally be imported if military, government personnel can establish to the satisfaction of Customs that the items were sent from the USA.
  - The best method is for the owner of the goods to register the weapons with Customs prior to export from the USA.
    - If the owner of the goods does not have a registration then a copy of sales receipts, the export OBL, inventory and a declaration will sometimes satisfy Customs.
    - Weapons purchased overseas are normally required to be imported using a Federal Firearms permit holder but some exceptions do apply to

allow non-resident individuals to apply for a permit directly with Alcohol, Tobacco, and Firearms (ATF).

- The ATF permit filing should be applied for at least 6 weeks in advance of the arrival of the shipment.

The application requires that the Customs broker who will handle the entry be named on the ATF application, so it is important that the application is filed properly

- from the start to avoid delays on arrival.
- The owner of the goods should consult with the USA agent when considering shipping any weapons and provide all the facts regarding how and where the weapons were acquired.
